

Exercices chapitre 5 – Fractions égales

Objectif 1 : Lire et représenter une fraction comme opérateur de partage.

Exercice 1 : Indique quelle fraction de chaque figure représente la partie colorée.

a.

b.

c.

d.

e.

f.

g.

Exercice 2 : Indique quelle fraction de chaque disque représente la partie colorée.

a.

b.

c.

d.

e.

f.

g.

Exercice 3 : Colorie la fraction du rectangle qui est indiquée.

a. $\frac{1}{8}$

b. $\frac{5}{8}$

c. $\frac{11}{20}$

d. $\frac{13}{20}$

e. $\frac{5}{12}$

f. $\frac{7}{12}$

g. $\frac{9}{16}$

Exercice 4 : Colorie la fraction du disque qui est indiquée.

a. $\frac{2}{2}$

b. $\frac{1}{4}$

c. $\frac{4}{5}$

d. $\frac{5}{6}$

e. $\frac{3}{8}$

f. $\frac{7}{10}$

g. $\frac{11}{12}$

Objectif 2 : Établir des égalités de fractions.

Exercice 5 : Pour chacune des fractions ci-dessous, compléter les pointillés.

Pour t'aider, tu pourras colorier les dessins sur la droite.

Exemple pour démarrer :

$$\begin{array}{c} \times 3 \\ \curvearrowright \\ \frac{2}{3} = \frac{6}{9} \\ \curvearrowleft \\ \times 3 \end{array}$$

A toi de jouer !

$$\begin{array}{c} \times \dots \\ \curvearrowright \\ \frac{1}{9} = \frac{\dots}{18} \\ \curvearrowleft \\ \times \dots \end{array}$$

$$\begin{array}{c} \times \dots \\ \curvearrowright \\ \frac{4}{6} = \frac{\dots}{24} \\ \curvearrowleft \\ \times \dots \end{array}$$

$$\begin{array}{c} \times \dots \\ \curvearrowright \\ \frac{1}{3} = \frac{\dots}{15} \\ \curvearrowleft \\ \times \dots \end{array}$$

Exercice 6 : Complète les pointillés ci-dessous. Tu pourras faire un dessin comme à l'exercice précédent pour t'aider.

a. $\frac{1}{5} = \frac{\dots}{25}$	b. $\frac{7}{8} = \frac{\dots}{72}$	c. $\frac{1}{10} = \frac{14}{\dots}$
d. $\frac{5}{6} = \frac{\dots}{42}$	e. $\frac{11}{9} = \frac{66}{\dots}$	f. $\frac{3}{5} = \frac{15}{\dots}$
g. $\frac{2}{11} = \frac{\dots}{121}$	h. $1 = \frac{17}{\dots}$	i. $5 = \frac{\dots}{4}$

Objectif 3 : Décomposer une fraction.

Exercice 7 : Complète le tableau ci-dessous.

	Colorie la fraction indiquée	Écris sous la forme d'un entier et d'une fraction < 1						
$\frac{19}{4}$	<table><tr><td> </td><td> </td><td> </td></tr><tr><td> </td><td> </td><td> </td></tr></table>							 + $\frac{\dots}{4}$
$\frac{23}{5}$	<table><tr><td> </td><td> </td><td> </td></tr><tr><td> </td><td> </td><td> </td></tr></table>							 + $\frac{\dots}{5}$

$\frac{13}{4}$	<table><tr><td> </td><td> </td></tr><tr><td> </td><td> </td></tr></table>					 + $\frac{\dots}{4}$				
$\frac{16}{3}$	<table><tr><td> </td><td> </td><td> </td></tr><tr><td> </td><td> </td><td> </td></tr></table>							 + $\frac{\dots}{3}$		
$\frac{23}{5}$	<table><tr><td> </td><td> </td><td> </td></tr><tr><td> </td><td> </td><td> </td></tr></table>							 + $\frac{\dots}{5}$		
$\frac{13}{2}$	<table><tr><td> </td><td> </td><td> </td><td> </td></tr><tr><td> </td><td> </td><td> </td><td> </td></tr></table>									 + $\frac{\dots}{2}$

Exercice 8 : Dans chacun des cas suivants :

- colorie la fraction du rectangle indiquée,
- écris la fraction sous la forme de la somme d'un nombre entier et d'une fraction plus petite que 1.

Exemple :

$$\frac{5}{3} = 1 + \frac{2}{3}$$

À toi maintenant :

a. $\frac{14}{5} = \dots\dots + \frac{\dots\dots}{\dots\dots}$

b. $\frac{10}{9} = \dots\dots + \frac{\dots\dots}{\dots\dots}$

c. $\frac{11}{4} = \dots\dots + \frac{\dots\dots}{\dots\dots}$

d. $\frac{23}{7} = \dots\dots + \frac{\dots\dots}{\dots\dots}$

Exercices supplémentaires

Exercice 9 : Indique quelle fraction de chaque carré représente la partie colorée.

Exercice 10 : Pour chaque figure, écris la fraction de l'aire du grand carré que représente chaque morceau.

Exercice 11 : Colorie la fraction de chaque figure qui est indiquée.

Exercice 12 : Colorie la fraction du disque qui est indiquée.

Exercice 13 : Colorie :

- En vert, le tiers du rectangle ci-dessous ;
- En bleu, les deux cinquièmes de ce qui reste ;
- En gris, la moitié de ce qui reste ;
- En rouge, les trois quarts de ce qui reste.

e. Quelle fraction du rectangle n'est pas coloriée ?

Exercice 14 : Colorie les trois quarts de la surface de chaque figure.
